Most important symptoms and effects, both acute and delayed:	Symptoms: Dizziness, Headache, Disorientation. Hazards: Danger of impaired breathing. Condition may deteriorate with alcohol consumption.
Self-protection of the first aider:	Avoid contact with skin, eyes or clothing. Wear personal protective clothing (see Section 8).
Inhalation:	Vapor concentration of 2,500-3,000 ppm causes minor irritation of the eyes, nose and throat. Inhalation of higher concentration may cause headache, nausea, confusion, drowsiness, convulsions, and coma. If inhaled, administer fresh air. Should symptoms develop, contact a doctor.
Eye Contact:	Can cause irritation of the eyes and mucous membranes. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Keep eye wide open while rinsing. Do not rub affected area. Get medical attention if irritation develops and persists.
Skin Contact:	Prolonged exposure to vapor may irritate the skin. Repeated and prolonged contact of the gel with the skin may cause dryness and erythema (inflammation) for those persons sensitive to ethyl alcohol. In the case of skin irritation or allergic reactions see a physician.
Ingestion:	Ingestion of a toxic dose can cause gastrointestinal irritation, narcosis and injury to the kidneys and liver. Clean mouth with water and drink afterwards plenty of water. Never give anything by mouth to an unconscious person. If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Get immediate medical advice/attention.
